

CoolFlux BSP32

Nirvana

NXP Semiconductors – Leuven, Belgium

Architecture

► CoolFlux BSP32

► Peripherals

- Interrupt controller
- Crossbreak
- Configuration registers

► Interfaces

- Memory AHB-Lite interface
 - Dual Harvard architecture
- APB programming interface
- APB debug interface
- CTI interface
- Interrupt interface
- Clock and reset interface

CoolFlux BSP32, ASIP Programmer Tool Flow

Software tools for CoolFlux BSP32

ASIP Programmer BSP32

Embedded SW programming, once the ASIP architecture is fixed (“frozen”)

- ▶ ChessDE IDE
 - Compiler
 - Assembler
 - Linker
 - Simulator
 - Hardware debugger
- ▶ Licenses required

Deliverables

- ▶ Tools including hardware debugger
- ▶ Support and training on Hardware, Software and Tools
 - First line support
 - Second line support
 - CoolFlux team
 - CodecArt for software
 - CodecArt and Synopsys for tools
- ▶ Software
 - Existing software (e.g. mathematical libraries, existing codecs)
 - On demand software can be developed
 - When CoolFlux BSP32 is opened for customers
 - CodecArt, third-party software house
